

# Another big move from NPD

## We're expanding our scope, and it's happening right now.

Upgraded tonnage, new equipment – and now... *four great new services*

### A capacity to please.

#### 1. New Zealand and the Islands

With our **NZPac** service sailings now *fixed day weekly* via Auckland and Tauranga (with new **South Island** calls also added) this service markedly improves our service offerings to and from **Fiji** and **Samoa**, with excellent connectivity to the **US West Coast** too.

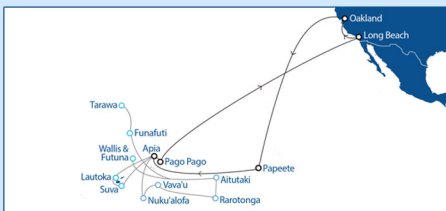

#### 2. Australia and the Pacific

Substantial re-structuring has enhanced our **AusPac** service coverage with *direct sailings* to **New Caledonia** and **Fiji** (from Sydney and Melbourne) *and now straight from Brisbane too* - plus **Vanuatu**. And our relay services to the **Samoas** and **Tonga** are suddenly 2-3 days faster!

#### 3. Australia and New Zealand

With our two new **Trans-Tasman** service loops *we're now going weekly* – providing an even broader reach to the **Pacific Islands**. This service will help to *streamline your supply chain* and create new just-in-time options and cost saving opportunities.

#### 4. U.S. West Coast and the Islands

First to be introduced and now well underway, our upgraded **CalPac** service provides Island importers in the **Samoas** and **Tahiti** and many other Island nations with additional dry and reefer capacity from the U.S. via California.

**Exceptional South Pacific coverage. That's NPD all over.**

*Click on the attachment!* These are our core trades, but we sail all over the South Pacific. View NPD's entire network – and find the details for your closest contact.
